reactstrap is a [react](#) component library for [bootstrap](#)

Reactstrap is currently compatible with Bootstrap 5.1. If you are using Bootstrap 4, you'll need to use [React](#)

## Getting Started

---

### Install Reactstrap:

```
npm install reactstrap react react-dom
```

Reactstrap currently requires React 16.8 or higher.

### Include Bootstrap

Either:

1. Import Bootstrap in your application code:

```
npm install --save bootstrap
```

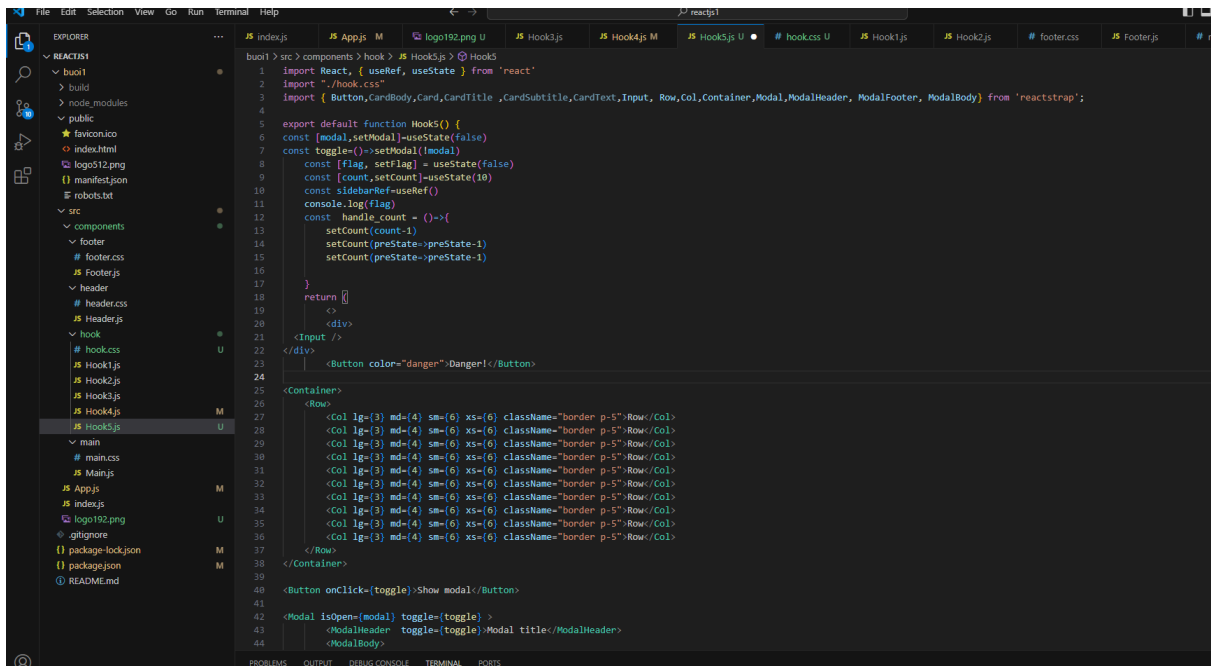

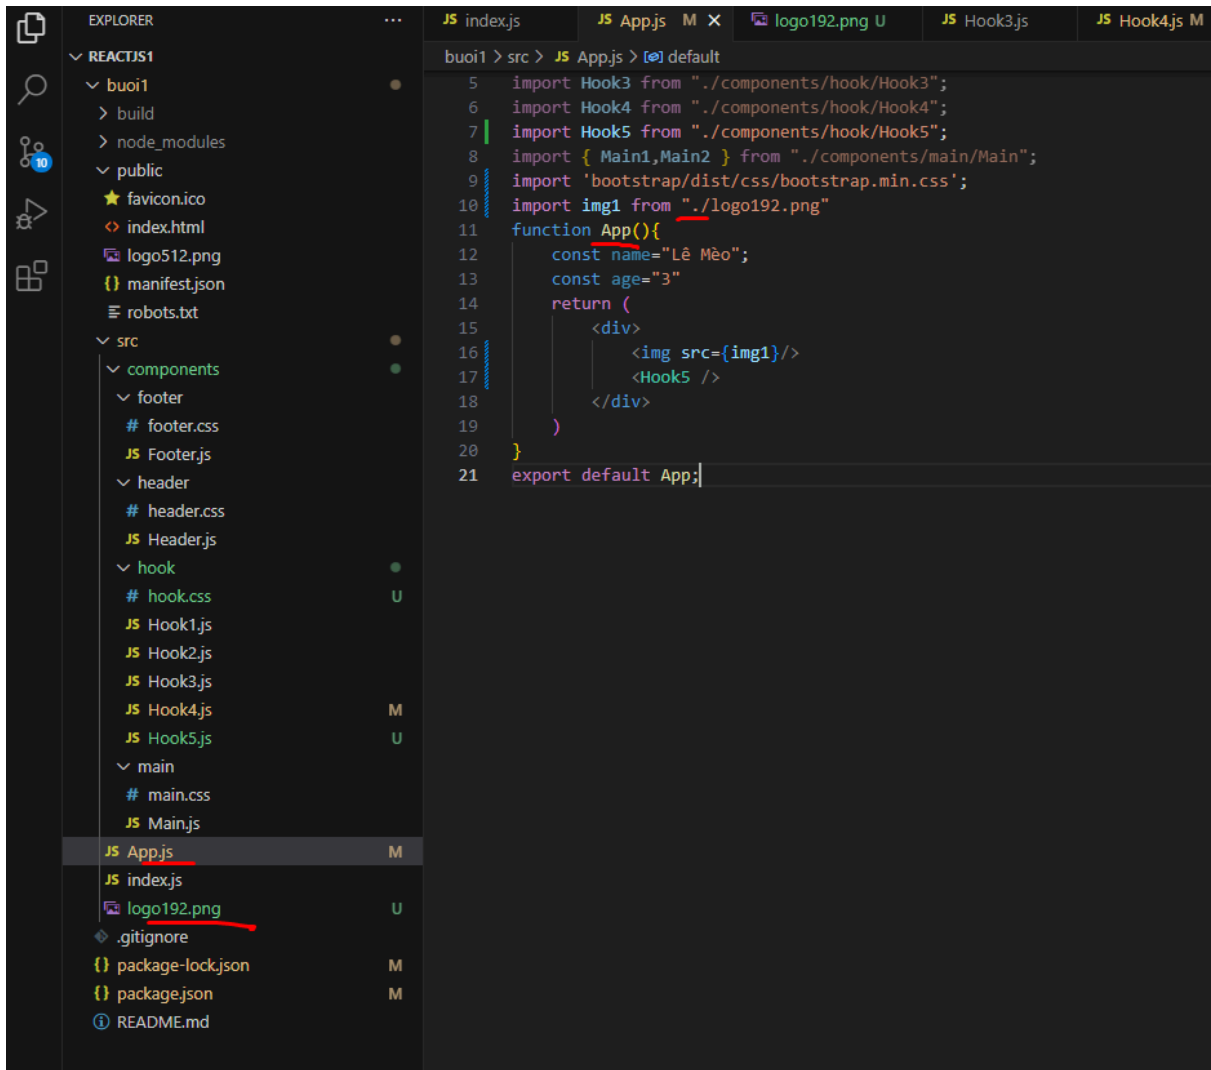

```
import 'bootstrap/dist/css/bootstrap.min.css';  
.
```

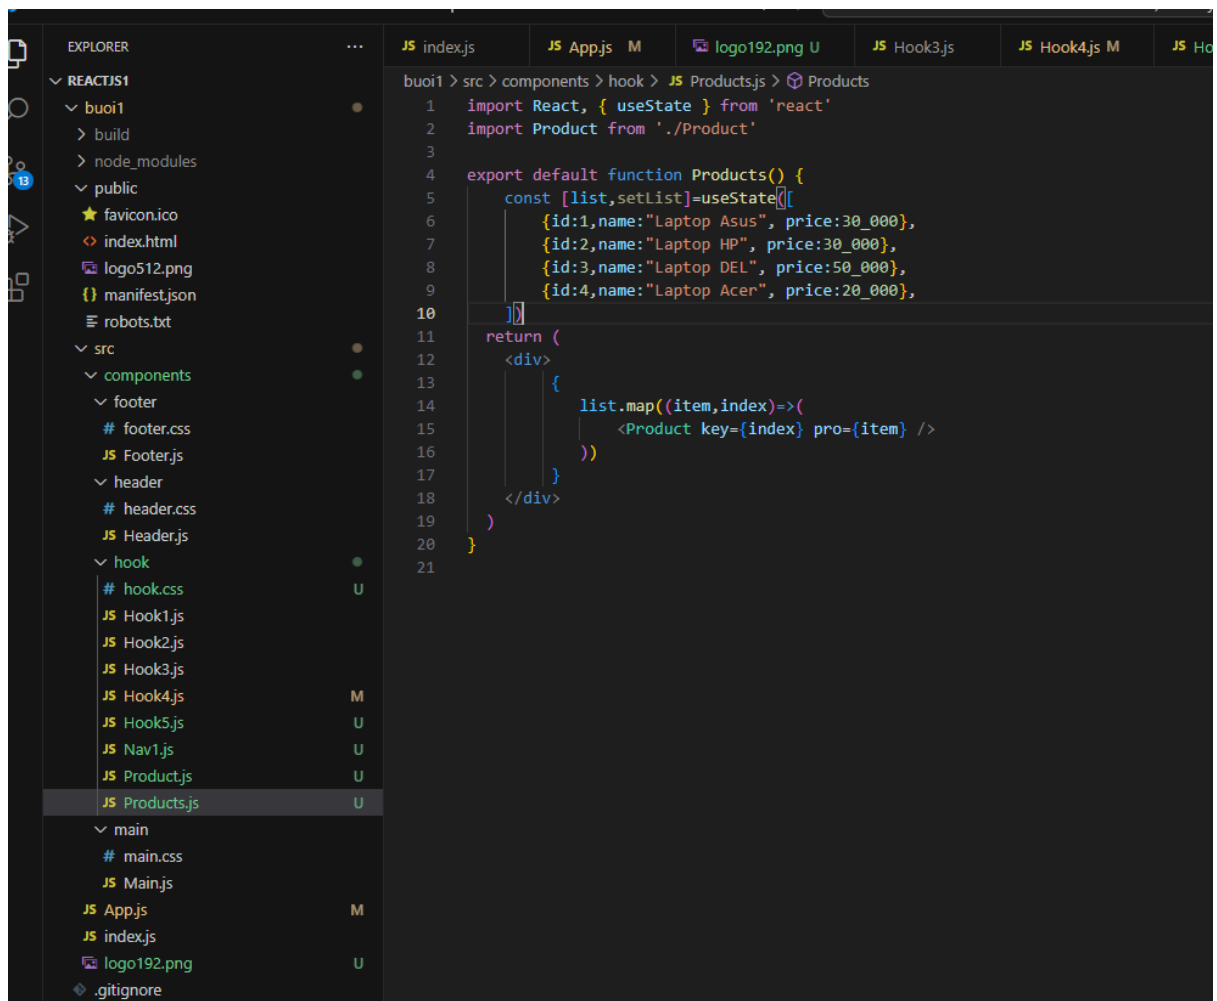

2. or include Bootstrap from a CDN URL in your HTML layout:

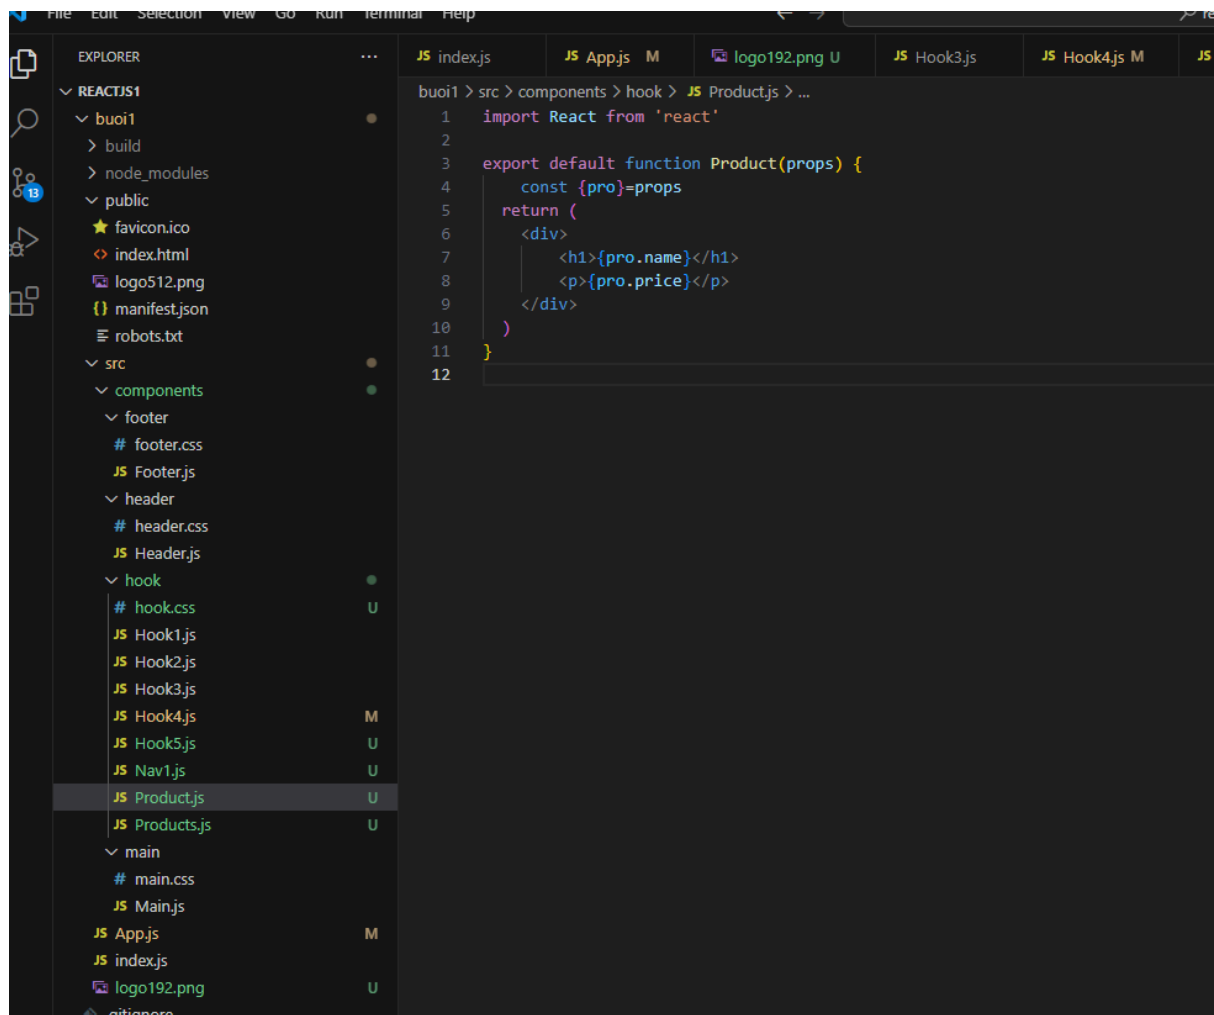

```
index.js    JS App.js M    JS Hook3.js    JS Hook4.js M    JS Hook5.js U X    # hook.css U    JS Hook1.js

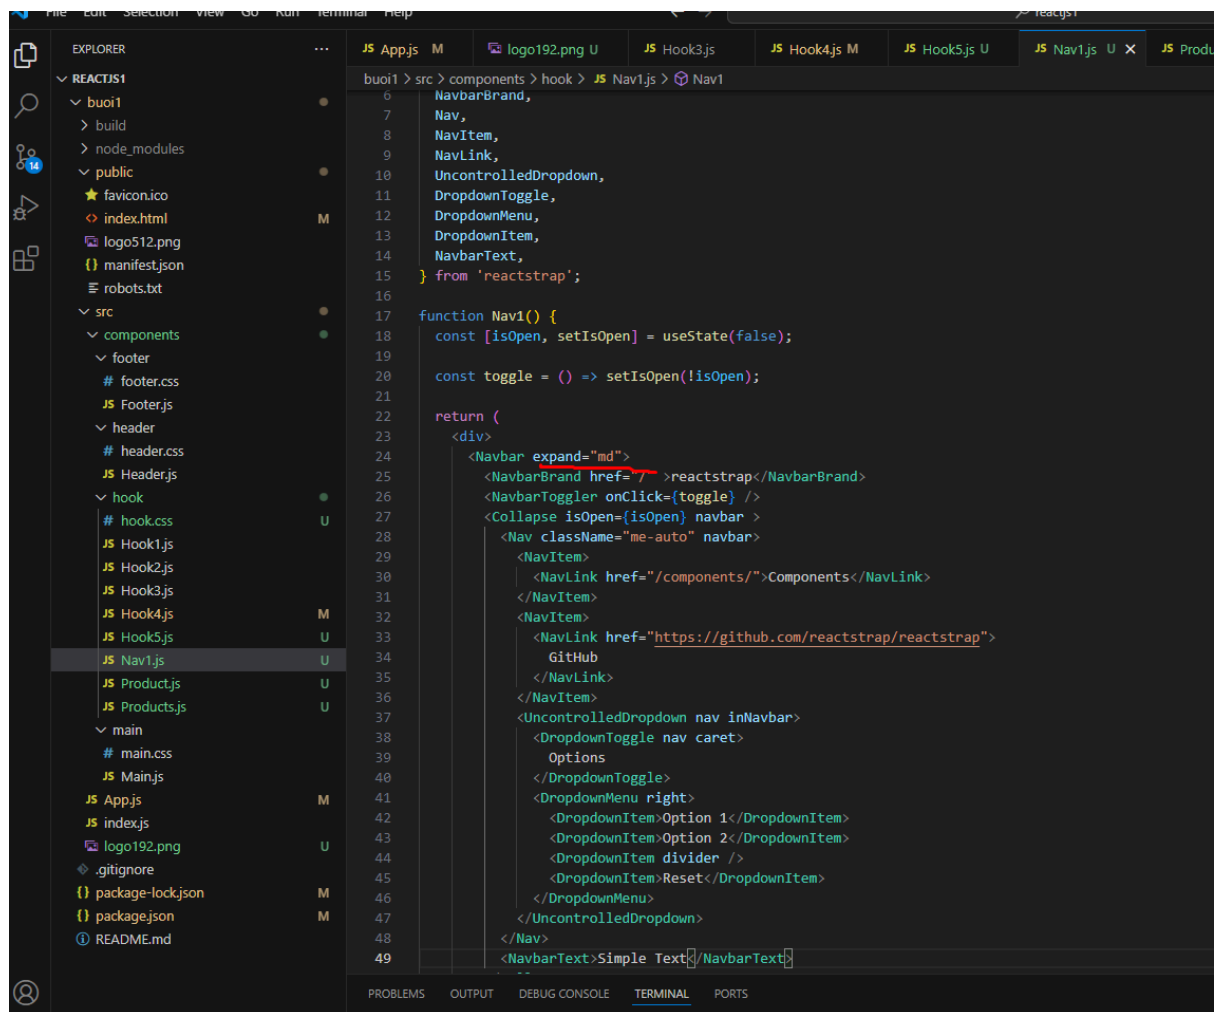

bi1 > src > components > hook > JS Hook5.js > ...
1  import React, { useRef, useState } from 'react'
2  import './hook.css'
3  import { Button,CardBody,Card,CardTitle ,CardSubtitle,CardText,Input} from 'reactstrap';
4
5  export default function Hook5() {
6    const [flag, setFlag] = useState(false)
7    const [count,setCount]=useState(10)
8    const sidebarRef=useRef()
9    console.log(flag)
10   const handle_count = ()=>{
11     setCount(count-1)
12     setCount(preState=>preState-1)
13     setCount(preState=>preState-1)
14
15   }
16   return (
17     <>
18     <div>
19       <Input />
20     </div>
21     <Button color="danger">Danger!</Button>
22     <Card
23       style={{
24         width: '18rem'
25       }}
26     >
27       
31       <CardBody>
32         <CardTitle tag="h5">
33           Card title
34         </CardTitle>
35         <CardSubtitle
```
